

Portfolio Summary

Portfolio Name	Currency	Hist. Yield	Portfolio Expense	FE fundinfo Risk Score
IP3 - Low Risk Index Portfolio	GBP	3.12	0.10	56

Portfolio Expense - The portfolio expense is calculated using the weighted value of the Ongoing Costs Ex Ante of the portfolio constituents. Where the Ongoing Costs Ex Ante is not available the OCF is used, and where this is not available the TER is used.
Please note: Historic yield figures will only be provided for funds with at least 12 months of performance history.

Volatility

Standard deviation is a statistical measurement which, when applied to an investment fund, expresses its volatility, or risk. It shows how widely a range of returns varied from the fund's average return over a particular period.

Maximum Gain

Represents the best running return over a specified period. E.g. The longest running consecutive gain without making a loss.

Maximum Loss

Represents the worst running return over a specified period. E.g. The longest running consecutive loss without making a gain.

Negative Periods

Indicates number of negative monthly returns during the specified period.

Positive Periods

Indicates number of positive monthly returns during the specified period.
